List of Contents

NUMBER 1

T.L. Saaty and L.G. Vargas	1	DIRAC distributions and threshold firing in neural networks
E.Y. Rodin and L.A. Adelani	7	Optimal harvesting of a renewable economic resource in a model with Bertalanffy growth law I
J.A. Adam	11	Some results on the spectrum of a magnetoatmospheric wave operator
R. Ahangar	15	Nonanticipating dynamical model and optimal control
S. Batterson and J. Smillie	19	Rayleigh quotient iteration fails for nonsymmetric matrices
T.C.E. Cheng	21	Optimal due-date assignment and sequencing in a single machine shop
D.J. Evans	25	New Runge-Kutta methods for initial value problems
M.D. Gunzburger LiSheng Hou and T.P. Svobodny	29	Numerical approximation of an optimal control problem associated with the Navier-Stokes equations
T. Jech	33	A remark on a principle of Brezis and Browder
A.Q.M. Khaliq and E.H. Twizell	35	Global extrapolation on three and four grids for special initial value problems
S.M. Kokoska	39	The analysis of cancer chemoprevention experiments in which there is interval censoring
F.R. Payne and M. Nair	45	Dynamic relaxation for elliptic problems
J.F. Selgrade	49	Dynamical behavior of a competitive model with genetic variation
J.J.S. Sentieiro	53	A base reduction method for convex programming
E.F. Toro	57	A CFL condition for characteristic based methods
K. Verma	61	Continuity of an unknown error function
D.A. Voss and A.Q.M. Khaliq	65	A sixth order predictor-corrector method for periodic IVPs
M. Zak	69	Non-lipschitzian dynamics for neural net modelling
J.-P. Barthelemy and F.R. McMorris	75	On an independence condition for consensus n-trees

R.D. Cameron, B.K. Bhattacharya and E.A.T. Merks	79	Efficient reconstruction of binary trees from their traversals
S.H. Chou and T.A. Porsching	83	A note on contraction numbers for additive correction methods
V.G. Dovi, O. Paladino and H. Preisig	87	Minimax approximations to theoretical models using experimental data
V.G. Dovi, H. Preisig and O. Paladino	91	Inverse free boundary problems
Wang Kunjian	97	A note on chaotic maps
A.G. Ramm	101	Numerical recovery of the 3*D* potential from fixed energy incomplete scattering data
A.G. Ramm	105	An inverse problem for Helmholtz's equation III
D.J. Evans and B.B. Sanugi	109	Errata - Numerical solution of the Goursat problem by a non-linear trapezoidal formula
	i	Instructions for authors
	iii	Sample pages for authors

NUMBER 2

E.L. Allgower and K. Georg	111	Estimates for piecewise linear approximations of implicitly defined manifolds
G. Caginalp and E.A. Socolovsky	117	Efficient computation of a sharp interface by spreading via phase field methods
C.G. Chakrabarti	121	Gauss'principle and statistical thermodynamics
J.C. Culioli and V. Protopopescu	125	An algorithm for linear programming that is easy to implement
J. Franců and A.K. Schierwagen	131	Wave transmission in cable structures of tree type
M. Fushimi	135	An equivalence relation between Tausworthe and GFSR sequences and applications
D.E. Knuth and H. S. Wilf	139	A short proof of Darboux's lemma
S.A. Maggelakis and J.A. Adam	141	Note on a class of nonlinear time independent diffusion equations
R. Menikoff	147	Curvature effect on steady detonation wave

A. Répaci	151	On the solution of a class of inverse evolution problems by a Bellman-Adomian method
E.Y. Rodin and **L.A. Adelani**	155	Optimal harvesting of a renewable economic resource in a model with Bertalanffy growth law II
C.C. Rousseau	159	A simply obtained asymptotic expansion for the probability that a random mapping is connected
G.P. Samanta and **C.G. Chakrabarti**	163	Stochastically perturbed Hopf bifurcation in an extended Volterra-Lotka system
J.N. Tsitsiklis	167	A comparison of Jacobi and Gauss-Seidel parallel iterations
J. Tweed and **G. Melrose**	171	Cracks of unequal length at the edge of an elliptic hole in out of plane shear
M. Zak	175	Chaos as a part of logical structure in neurodynamics
M. Ahues	179	A note on strong stability of finite element approximations
A. Ambrosetti and **M. Struwe**	183	Existence of steady vortex rings in an ideal fluid
A. Arnold, P. Degond, P.A. Markowich and **H. Steinrück**	187	The Wigner-Poisson problem in a crystal
M.C. Fu	193	On the consistency of second derivative perturbation analysis estimators for the M/G/1 queue
G. Zhang	199	Bivariate Thiele-type branched continued fraction and general order Padé approximation
K. Sugihara and **M. Iri**	203	Two design principles of geometric algorithms in finite-precision arithmetic
R. Souidi	207	On the distribution of the test statistic for detecting a point of change in real and Gaussian A.R.M.A. parameters
	i	Instructions for authors
	iii	Sample pages for authors

NUMBER 3

N.M. Arató	211	**Equivalence of Gaussian measures corresponding to generalized random fields**

A.J. Baker, W.P. Noronha, and E.L. Wachspress	215	Consistent sparse factorization of elliptic difference equations
C. Constanda	221	Potentials with integrable density in the solution of bending of thin plates
M.D. Gunzburger and R.A. Nicolaides	225	An algorithm for the boundary control of the wave equation
J. Hulshof	229	Similarity solutions of the porous medium equation with sign changes
L. Jódar	233	On the Euler matrix differential equation $A_2t^2X'' + A_1tX' + A_0X = 0$
M. Kobayashi	239	Comments on eigenfunction expansions of discontinuous Sturm-Liouville systems
Y. Lin	243	On inverse systems of general systems
J. Lorente, and V. Ramírez	247	An application of interpolation systems to the finite element method
M.A. Noor	251	Nonlinear quasi complementarity problems
V. Pan	255	Fast evaluation and interpolation at the Chebyshev sets of points
L. Pandolfi	259	A class of boundary perturbations described by bounded operators
A.G. Ramm	263	Necessary and sufficient condition for a scattering amplitude to correspond to a spherically symmetric scatterer
R.P. Srivastav and F. Zhang	267	On numerical methods of solving the Cauchy singular integral equation
J. Sztipanovits	273	A computation model for semantic control
R.H. Warren	277	Classifying traveling salesman problems
M. Zak	281	Unsupervised learning in neurodynamics using example-interaction approach
N. Cercone and M. Krause	287	An informal analysis of perfect hash function search
J.F. Epperson	293	On the use of Green's functions for approximating nonlinear parabolic PDE's

R. Mathias	297	An improved bound for a fundamental constant associated with a P-matrix
S. Mittnik and S.T. Rachev	301	Stable distributions for asset returns
I.G. Tollis	305	On finding a minimum vertex cover of a series-parallel graph
	i	Instructions for authors
	iii	Sample pages for authors

NUMBER 4

G. Adomian and R. Rach	311	Analytic parametrization and the decomposition method
I. Altas and J.W. Stephenson	315	Existence of second order discretizations on irregular mesh
P. Arnoux	319	Some remarks about Fibonacci multiplication
P. Bogacki and L.F. Shampine	321	A 3(2) pair of Runge-Kutta formulas
C. Castillo-Chavez, K. Cooke, W. Huang and S.A. Levin	327	Results on the dynamics for models for the sexual transmission of the human immunodeficiency virus
T.C.E. Cheng	333	Optimal assignment of slack due-dates and sequencing in a single-machine shop
L. Debnath and U. B. Guha	337	The Cauchy-Poisson problem in an inviscid stratified liquid
F. Flandoli	341	A new proof of an a priori estimate arising in boundary control theory
E.O. George, I.J. McGee and C.C. Rousseau	345	Asymptotic expansion of the logistic midrange
C.S. Kubrusly	349	A note on the Lyapunov equation for discrete linear systems in Hilbert space
G.D.C. Kuiken	353	Algorithms for the evaluation of Bessel functions of complex argument and integer orders
Y. Lin	357	On L-fuzzy systems
M. Mangel and C.S. Peters	361	Computation of the fitness and functional response of Holling's "Hungry Mantid" by the WKB method

S.A. Obaid	367	Two new trigonometric formulas with applications
R. Quintana, Jr	371	Birkhoff's theorem on manifolds
R. Rach	373	Decomposition solution of a proposed counterexample
R. Rach and **G. Adomian**	377	Smooth polynomial expansions of piecewise-differentiable functions
J. Shen	381	Dynamics of regularized cavity flow at high Reynolds numbers
A. Shidfar and **H.R. Nikoofar**	385	An inverse problem for a linear diffusion equation with non-linear boundary condition
C.C.S. Sin and **T.C.E. Cheng**	389	On the *NP*-completeness of the n/m/parallel/ $\sum_{i \in m} \{\sum w_j \sum t_j\}$ scheduling problem
R.U. Verma	391	Multiparameter spectral theory of a separating operator system
M.J. Ward, L.G. Reyna and **F.M. Odeh**	395	Multiple steady state solutions in a multi-junction structure
B. Xiao and **P.T. Harker**	401	Perturbation results for the linear complementarity problem
V.C. Zelati	407	Periodic solutions for N-body type dynamical systems
	i	Instructions for authors
	iii	Sample pages for authors
